

## DW32 & DW42

The Kingray® DW32 and DW42 are high gain professional MATV distribution amplifiers. They feature separate VHF & UHF antennas inputs or a combination antenna input. Featuring 'F' connector inputs, adjustable gain control and a two stage cable equalization circuit, These amplifiers include a three band adjustable equalization circuit ensuring that all three bands (44-144MHz, 174-300MHz, 470-860MHz) are all output at a similar level. The amplifiers are housed in a die cast enclosure for maximum protection from stray signals. Typically these amplifiers would be used in large multiple outlet systems like hotels, motels and apartment blocks. Both amplifiers also include a -30dB test point.

	FREQUENCY	GAIN	INPUTS	NOISE FIGURE	GAIN CONTROL	OUTPUT	POWER SUPPLY
VHF	44-230	26-28	2	3.5dB	10	112	Packed with (PSK12S)
UHF	470-860	32			10		

	FREQUENCY	GAIN	INPUTS	NOISE FIGURE	GAIN CONTROL	OUTPUT	POWER SUPPLY
VHF	44-144	35-37	1, 2 or Com-bined	3.5dB	20	112	Packed without (Needs PSK18S)
	176-300				20		
UHF	470-860	40			20
