MHW25FE

DIGITAL TV MASTHEAD AMPLIFIER

Thank you for selecting an Australian designed and built masthead amplifier.

This Kingray masthead amplifier is engineered to provide low band VHF plus 4G LTE & 5G filtering to maximise interference rejection.

INSTALLATION

The Kingray masthead amplifiers have several built-in filters for interference rejection. The MHW25FE masthead amplifier includes low band filtering to eliminate interfering services below 174 MHz and 4G LTE as well as 5G filtering.

MHW25FE includes a switchable FM radio filter.

To configure the amplifier, please follow Fig.1 below.

FM filter

To eliminate FM radio interference; make sure both jumper links are on the 'FM TRAP IN' (DEFAULT).

TECHNICAL ADVICE

1. **Check** there is no earth braid touching the centre conductor on the coaxial cable.
2. **Is there more than one outlet?** Check the splitter box, the power supply must be connected to the coaxial outlet that feeds the AC/DC leg of the splitter box to pass power to the head unit. (Check if LED is on in the amplifier).
3. **Is there now too much signal causing an overload effect?** Try turning down the gain controls on the masthead unit, or select a lower gain amplifier.
4. **There is a white line moving through the picture:** Try a PSK06 14 V DC power supply.

Please see diagrams below for installation tips.
