Description

Ubiquiti UniFi UDM-PRO | UniFi Dream Machine Pro with UniFi Controller

The UniFi® Dream Machine Pro is an all-in-one network appliance for a scalable network in an office, retail, or hospitality environment. Powered by a fast 1.7 GHz quad-core processor, the UDM Pro combines multiple functions into a single device.

Features

- Advanced Security Gateway with Built-in Switch
- Dual WAN Ports: One 10G SFP+ and One Gigabit RJ45
- One 10G SFP+ LAN Port
- Embedded Enterprise Software: UniFi Network
- 3.5" / 2.5" HDD Bay for NVR Storage
- **Automatic QoS:** Top QoS priority is assigned to voice and video traffic.
- **VPN Server for Secure Communications:** A site-to-site VPN secures and encrypts private data communications traveling over the internet.
- **Convenient VLAN Support:** The UDM Pro can create virtual network segments for security and network traffic management
- **Innovative Display:** The 1.3" touchscreen displays status information for easy monitoring and quick troubleshooting.
- **WAN Ports:** 1 x 10G SFP+ and 1 x 1G RJ45 port
- **LAN Ports:** 1 x 10G SFP+ and 8 x 1G RJ45 ports
- 1U Rackmountable (hardware included)

Software

The UDM Pro includes the UniFi Network Controller so you can manage your UniFi Switches and APs. It can also run the UniFi Protect software for convenient monitoring and complete management of your camera surveillance system. Video recordings are stored on the built-in NVR (hard drive not included) and can be easily accessed using the UniFi Protect mobile app. Via remote access, you can securely view the recordings that are privately stored on the UDM Pro rather than a third-party server.

Powerful Security

The UDM Pro offers advanced firewall policies and persistent threat management (requires UniFi software V5.12 or newer) to act as an Intrusion Prevention System (IPS) and Intrusion Detection System (IDS).

- **Threat Management:** Easily select and customize levels of security for viruses and malware, Point-to-Point (PtP) protection, hacking, internet traffic, and website reputation.
- **Endpoint Scanning:** The UDM Pro automatically scans endpoints (clients) connected to your network to identify potential security threats and vulnerabilities.
- **Honeypot:** Embedded Honeypot functionality can detect malware, worms, and other types of malicious traffic trying to scan your network for vulnerabilities.
- **DNS Content Filtering:** DNS filters block traffic from sites with malicious, phishing, or adult content. There are three levels of DNS filtering security, each adding more protection.
- **GeoIP Filtering:** GeoIP filtering allows you to block outgoing, incoming, or bi-directional traffic designated by country. Use the UniFi threat map to select the countries you intend to block.

Superior Performance

The UDM Pro offers significantly greater performance over the previous generation of UniFi Security Gateways

Additional Information

Product Name	Ubiquiti UniFi UDM-PRO UniFi Dream Machine Pro with UniFi Controller
Part#:	UB.UDM.PRO
Weight (kg)	5.200000
Manufacturer	Ubiquiti
GTIN	810010071033
Form Factor	Desktop/ Rackmount
PoE	No PoE
SFP	Yes SFP
Number of Ports	8-12
Predominant Port Type	Gigabit Copper
Colour	White
Warranty	1 Year
